

Let Our Experience Benefit You

R.A. Rezzelle provides professional mechanical and electrical design services, drafting, digital video production, AutoCAD training, and environmental consulting to a variety of industries. Established in 1982, we have served FORTUNE 100 firms, specialized engineering/architectural firms, and construction companies. Using the latest in computer-aided design and drafting (CADD) technology, digital technology, and environmental testing, we are dedicated to delivering a quality product on time and within budget.

Our mechanical and electrical designers, CADD operators, and environmental lab specialists provide a diverse base of experience and technological capabilities. Our team of professionals all work together to help you achieve your goals and ultimately your success.

As a technical and environmental support firm, we understand your staffing requirements. You will benefit from our expertise and the full backup of our design capabilities. Our services allow you to staff your company with experienced personnel to meet new challenges and tight deadlines without making costly investments.

Our Commitment

Our team of professionals will meet your challenge, whether you need additional design help to get through a peak period, drawing conversions, or assistance with environmental concerns. We give the very best when it comes to problem solving. Our business is to provide you with the finest technical and environment support services available.

Technical and Graphic Services

R.A. Rezzelle has a combination of experience in technical design and CADD support for industrial, commercial and residential projects. We have an in-depth background providing various services to the pulp/paper and chemical industries with concept development through all phases of the design process.

We can provide your engineering department with project supervision, mechanical designers, electrical designers, field technicians, and CADD operators at your company's location or off-site. Our many services include conceptual development, technical design and detailing, field verification, as-built documentation, CADD, drawing conversions, and system configuration.

Our technical design teams are experienced in all disciplines including: Electrical, Mechanical, Piping, Structural, Civil, and Architectural. Here are some of the services that can be provided,

Machinery Design	P&ID's	Isometric piping
Equipment layouts	Logic diagrams	Commercial offices
Baseplate layouts	Panel layouts	Warehouses
Platforms	Elementaries	Training manuals
Conveyors	Conduit schedules	Graphic illustration
Shafts	Interconnect diagrams	
Gears	Cable/Conduit routing	
Spare part Detailing	PLC I/O diagrams	
Plastic parts	Lighting	

We will work closely with your design staff to understand your objectives and deliver a complete solution. Whether performing conceptual designs, working on CADD, or making field investigations, we are always dedicated to speed and accuracy.

Custom Computer Training

R.A. Rezzelle provides customized AutoCAD training for both individuals and corporations. Our training services are counted among the very best in the industry with experienced instructors, customer specific training, one-on-one assistance, flexible class schedules, on-site training, and customized training material. Our senior instructor has over 15 years of AutoCAD experience, as well as an extensive background in engineering.
